## Permanent Course Information

### Yellow (quite easy) course – 2 km

**ORIENTEERING:** is the sport of finding your way on a course from one point (control) to another using a map. It can be done at speed, or at a gentle pace to allow you to enjoy the scenery!

**THE MAP:** Orienteering maps are drawn using internationally recognised symbols and colours to give a detailed representation of terrain and features. Open land is coloured yellow, open forest is white, and shades of green indicate density of vegetation. The scale of this map is 1:5,000 which means that 1cm on the map is 50 metres on the ground. The vertical lines with an arrow at the top point to magnetic north; turn your map so that it is also pointing north and the features around you match what you can see on the map.

**THE COURSE:** The centre of each circle on the map indicates the position of a control post, and the control post number is written beside each circle. The control descriptions below describe the feature where the control post is located. The START is shown on the map by a triangle; go to each control in order until you reach the FINISH which is shown by a double circle. Check you have got to the right control each time by making sure the number on the post is the one shown against the control number, and write down the two-letter code to confirm you have been there.
